New grounds of rejection

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Paul Kohl et al. "Wafer-Level Packaging Addresses ... Interconnections", Apr '01 in combination with Paul Kohl et al. "Air-Gap ... for interconnections" 1998.

With respect to claim 1, Kohl et al. of "Wafer-Level Packaging Addresses ... Interconnections" teach a structure for providing resilient interconnections in a wafer level package, comprising a conductive pad overlays an air space, wherein at least a portion of the air space extends laterally beyond the conductive pad. See fig 1. and its associated text of Kohl et al.

Kohl et al. appear to fail to teach that the conductive pad or lead directly overlays the air space.

Kohl et al. of "Air-Gap ... for interconnections" teach conductive pad or lead directly overlays the air space. See figs. 1(a)-1(c) and associated text.

It would have been obvious to one of ordinary skill in the art of making semiconductor devices to form the lead or pad directly over the air space in structure of Kohl et al. of "Wafer-Level Packaging Addresses ... Interconnections" to reduce intralevel dielectric constant. See figs. 1(a)-1(c) and associated text.

Response to Arguments

1. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

2. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
